To Accompany Map of Southern Louisiana, Dated March, 1915

## PREFACE.

---

This pamphlet is issued supplemental to a map of southern Louisiana, on a scale of 1 inch equals 6 miles, prepared and published by the United States Engineer office, Customhouse, New Orleans, La., dated March, 1915. Copies of map may be obtained at said office for the price, \$1.

The indexing of the towns and waterways in southern Louisiana, as herein detailed, is the first of its kind ever attempted.

Distances of waterways in Louisiana have been compiled from survey maps on file in this office.

Draft of streams in southern Louisiana are obtained from surveys and inspections. Other drafts are obtained from report of Chief of Engineers, 1914.

Other information in regard to the distances other than southern Louisiana were obtained from district Engineer officers, Corps of Engineers, United States Army, and reports of Chief of Engineers and other private sources.

Ocean distances were derived mainly from the publication by the Hydrographic Office, 1912.

Distances are given in statute miles unless otherwise noted. (Ocean distances are given in both statute and nautical miles.)

This work was carried on in the United States Engineer office under the direction of Maj. Edward H. Schulz, Corps of Engineers, and under the supervision of Mr. T. E. L. Lipsey, assistant engineer, by Mr. Albert H. Guillot, draftsman.
